# CASE STI

# TRICARE ASHGROVE 31 NATHAN AVE ASHGROVE, QLD 4060

Date: November 2019 Project: TriCare Ashgrove

Builder: Woollam Constructions

Contractor: Six Star Tiling **Application:** Waterproofing

### **PRODUCTS USED**

**WPA 160** 

WPA 200

WPA 230UV

WPA 360

WPA 460

WPA 560

**WPA 992UV** 

WPA MS

WPA SB

WPA Aqualay

WPA Elastoband

WPA Drainage Cell

(see more products on the next page)

Tricare Ashgrove aged care residences were constructed by Woollam Constructions. It was a project managed by TriCare, and Bayset was proud to provide the specifications.

Completed in 2023, the brand-new, contemporary aged care residence has everything needed to live in comfort, offering hotel-style amenities, a wellness suite, a sky pavilion with city views, and an onsite cafe.

Set in luxurious surroundings overlooking Ithaca Creek and offering beautiful views of Brisbane City.

WINDOW & DOOR REVEALS (MASONRY SUBSTRATE)

WPA 460, a two-part water-based epoxy primer Primer:

used to seal concrete and masonry

surfaces.

Transitions: WPA MS, a single-component, moisture-cured

silane-modified hybrid sealant.

WPA 230UV one-part fibre-reinforced water-Membrane:

based polyurethane membrane (minimum of 2 coats to achieve a DFT of 1000 microns).

**WINDOW & DOOR REVEALS (STEEL SUBSTRATE)** 

WPA 160, a specialised solvent-free Primer:

primer designed for enhancing the adhesion of

subsequent membranes.

WPA MS, a single-component, moisture-cured Transitions:

silane-modified hybrid sealant.

Membrane: WPA 230UV, a one-part fibre-reinforced water-

> based polyurethane membrane (minimum of 2 coats to achieve a DFT of 1000 microns).

LAUNDRY WET / DRY

WPA 360, a water-based, low-solids, fast-Primer:

drying primer.

Transitions: WPA Elastoband, an innovative detailing system

designed for waterproofing and sealing all types of points, junctions and general areas

subject to movement.

Membrane: WPA 200, a highly flexible, two-part, rapid

> drying, cementitious waterproofing membrane (minimum of 2 coats to achieve a DFT of 1000

microns).

Movement

Joints: TPA Tru Colour Sanitary Silicone, a mould-

resistant, non-diluted, high-performance, UVresistant, neutral cure silicone sealant.

**BIN STORE & DRY ROOM** 

Hychem E100 Epoxy Primer is a solvent-based, Primer:

two-component epoxy primer.

Ероху

Flooring: Hychem SupaFloor, a high-build, multi-

purpose pigmented epoxy coating (1st coat).

Slip

Resistance: Broadcast CA 60 or similar nonslip aggregate

to refusal over the wet base coat.

Wear Coat: Hychem SupaFloor, a high-build, multi-

purpose pigmented epoxy coating (2nd coat).

Soprema Antirock, a solvent-based bituminous

**DEEP PLANTING & LEVEL 1 COURTYARD LANDSCAPE** 

primer.

Membrane

Base Sheet: Soprema Soprasun Plus 3, an APP-modified

bitumen sheet membrane.

Membrane

Cap Sheet: Soprema Sopragum Garden 4 Plus, a root-

resistant APP-modified bitumen sheet

membrane.

Membrane

Termination: K Flashing, an extruded aluminium flashing

> with pre-punched holes, designed for the top termination of sheet membrane systems.

Mastic

Sealant: Soprema Sopramastic, a solvent-based

bitumen mastic.

Liquid

Flashing: Soprema Alsan Flashing Quadro, a single-

> component polyurethane/bitumen liquid flashing to be used in conjunction with a

reinforcing fabric.

Flashing

Reinforcement: Soprema Alsan Fleece, a non-woven perforated

polyester fleece to be used in conjunction with

Alsan Flashing Quadro.

Membrane

Protection: WPA Drainage Cell, a drainage cell and root-

resistant protection board.

LEVEL 1 COURTYARD CAPPING BEAM AREA

WPA 560, two-part water-based epoxy primer. Primer:

Non-Porous

Surfaces: WPA SB, a clear fast-drying solvent-

based primer.

WPA FC, a high-performance, fast cure, one-Transitions:

component polyurethane sealant.

Membrane: WPA 992 UV, a one-part liquid applied

moisture-cured UV stable polyurethane membrane system, which is suitable for

exposed applications.

Membrane

Protection: WPA Drainage Cell, a drainage cell and root-

resistant protection board.

WET AREAS AQUALAY SYSTEM

WPA 360, a water-based, low-solids, fast-Primer:

drying primer.

Primer:

Membrane

Adhesive: WPA 200, a highly flexible, two-part, rapid

drying, cementitious waterproofing membrane (minimum of 2 coats to achieve a DFT of 1000

microns).

Waterproofing

Membrane: WPA Agualay, an innovative, high-performance,

flexible, easy-to-install new-generation sheet

waterproofing membrane system.

Transitions: WPA Elastoband, an innovative detailing system

> designed for waterproofing and sealing all types of points, junctions and general areas

subject to movement.

Detail

WPA 200, a highly flexible, two-part, rapid Membrane:

drying, cementitious waterproofing membrane (minimum of 2 coats to achieve a DFT of 1000

microns).

Primer: WPA 460, a two-part water-based epoxy primer

used to seal concrete and masonry

surfaces.

Transitions: WPA MS, a single-component, moisture-cured

silane-modified hybrid sealant.

Membrane: WPA 230UV, a one-part fibre-reinforced water-

based polyurethane membrane (minimum of 2 coats to achieve a DFT of 1000 microns).

**BALCONIES** 

WPA 460, a two-part water-based epoxy primer Primer:

used to seal concrete and masonry

surfaces.

Fillets /

Bond Breaker: WPA MS, a single-component, moisture-cured

silane-modified hybrid sealant.

WPA 230UV, a one-part fibre-reinforced water-Membrane:

> based polyurethane membrane (minimum of 2 coats to achieve a DFT of 1000 microns).

Screed: ACS Traditional Floor Screed, a pre-blended

screed underlayment specially formulated for

internal & external floor areas.

Primer: WPA 460, a two-part water-based epoxy primer

used to seal concrete and masonry

surfaces.

Fillets /

Bond Breaker: WPA SPUR, a high quality, professional,

universal, low modulus sealant based on hybrid

technology.

WPA 230UV, a one-part fibre-reinforced water-Membrane:

based polyurethane membrane (minimum of 2

coats to achieve a DFT of 1000 microns).

**BLOCKWORK WALLS TO THE EXTERNAL FACES OF** STAIRS 1, 2 & 3, & EXTERNAL FACE OF BLOCKWORK OF **SERVERY WALL.** 

Primer: WPA 460, a two-part water-based epoxy primer

used to seal concrete and masonry

surfaces.

Transitions: WPA Elastoband, an innovative detailing system

> designed for waterproofing and sealing all types of points, junctions and general areas

subject to movement.

WPA 200, a highly flexible, two-part, rapid Membrane:

> drying, cementitious waterproofing membrane (minimum of 2 coats to achieve a DFT of 1000

microns).

**ROOFTOP, STAIR LIDS & LIFT OVERRUN** 

Primer: WPA 460, a two-part water-based epoxy primer

used to seal concrete and masonry

surfaces.

Transitions: WPA MS, a single-component, moisture-cured

silane-modified hybrid sealant.

Membrane: WPA 230UV, a one-part fibre-reinforced water-

> based polyurethane membrane (minimum of 2 coats to achieve a DFT of 1000 microns).

**ROOF TERRACE PLANTER** 

Primer (floor and

block walls): WPA 560, a two-part, water-based epoxy

primer.

Primer (concrete

Soprema Elastocol Stick, an SBS synthetic wall):

rubber adhesive primer. Note: Primer to cover.

Detail strips: Soprema Colphene 3000, a self-adhesive SBS-

modified sheet membrane system.

Membrane

(first layer): Soprema Colphene 3000, a self-adhesive SBS-

modified sheet membrane system.

Membrane

(second layer): Soprema Colphene 3000, a self-adhesive SBS-

modified sheet membrane system.

Membrane

Aluminium Pressure Seal, extruded termination Termination:

bar to top edge & footing termination.

Mastic

Soprema Sopramastic, solvent-based Sealant:

hitumen mastic.

Flashing:

Soprema Alsan Flashing Jardin, a singlecomponent polyurethane/bitumen liquid flashing to be used in conjunction with a

reinforcing fabric.

Flashing

Reinforcement: Soprema Flashing Reinforcement, a polyester

stitch-bonded reinforcing fleece.

Membrane

Protection: WPA Drainage Cell, a drainage cell and root-

resistant protection board.

**RAC TERRACE** 

WPA 460, a two-part water-based epoxy primer Primer:

used to seal concrete and masonry

surfaces.

Non-Porous

Surfaces: WPA 160, a specialised solvent-free

primer designed for enhancing the adhesion of

subsequent membranes.

Transitions: WPA Elastoband, an innovative detailing system

designed for waterproofing and sealing all types of points, junctions and general areas

subject to movement.

Membrane: WPA 200, a highly flexible, two-part, rapid

> drying, cementitious waterproofing membrane (minimum of 2 coats to achieve a DFT of 1000

microns).

Screed: ACS Screed, a pre-blended screed

underlayment specially formulated for internal

& external floor areas.

WPA 460, a two-part water-based epoxy primer Primer:

used to seal concrete and masonry

surfaces.

Non-Porous

Surfaces: WPA 160, a specialised solvent-free

primer designed for enhancing the adhesion of

subsequent membranes.

Transitions: WPA MS, a single-component, moisture-cured

silane-modified hybrid sealant.

WPA 230UV, a one-part fibre-reinforced water-Membrane:

based polyurethane membrane (minimum of 2 coats to achieve a DFT of 1000 microns).

**KITCHEN & SERVERY** 

Primer: WPA 460, a two-part water-based epoxy primer

used to seal concrete and masonry

surfaces.

Transitions: WPA Elastoband, an innovative detailing system

> designed for waterproofing and sealing all types of points, junctions and general areas

subject to movement.

Membrane: WPA 230UV, a one-part fibre-reinforced water-

based polyurethane membrane (minimum of 2 coats to achieve a DFT of 1000 microns).

Screed: ACS Screed, a pre-blended screed

underlayment specially formulated for internal

& external floor areas.

Primer: WPA 460, a two-part water-based epoxy primer

used to seal concrete and masonry

surfaces.

Transitions: WPA Elastoband, an innovative detailing system

> designed for waterproofing and sealing all types of points, junctions and general areas

subject to movement

Floor

Membrane: WPA 230UV, a one-part fibre-reinforced water-

> based polyurethane membrane (minimum of 2 coats to achieve a DFT of 1000 microns).

Wall

Membrane: WPA 230UV, a one-part fibre reinforced water-

based polyurethane membrane (minimum of 2 coats to achieve a DFT of 1000 microns).

**INTERNAL PLANTER BOXES** 

Primer: WPA 460, a two-part water-based epoxy primer

used to seal concrete and masonry

surfaces.

Non-Porous

Surfaces: WPA 160, a specialised solvent-free

primer designed for enhancing the adhesion of

subsequent membranes.

Transitions: WPA Elastoband, an innovative detailing system

> designed for waterproofing and sealing all types of points, junctions and general areas

subject to movement.

Membrane: WPA 200, a highly flexible, two-part, rapid

> drying, cementitious waterproofing membrane (minimum of 2 coats to achieve a DFT of 1000

microns).

Membrane

WPA Drainage Cell, a drainage cell and root-Protection:

resistant protection board.

### **EXTERNAL PLANTER BOXES**

WPA 460, a two-part water-based epoxy primer Primer:

used to seal concrete and masonry

surfaces.

Non-Porous

WPA 160, a specialised solvent-free Surfaces:

primer designed for enhancing the adhesion of

subsequent membranes.

Transitions: WPA Elastoband, an innovative detailing system

designed for waterproofing and sealing all types of points, junctions and general areas

subject to movement.

Membrane: WPA 200, a highly flexible, two-part, rapid

drying, cementitious waterproofing membrane (minimum of 2 coats to achieve a DFT of 1000

microns).

Membrane

WPA Drainage Cell, a drainage cell and root-Protection:

resistant protection board.

### **EXTERNAL PLANTER BOX CAPPING & EXTERNAL WALLS**

Primer: WPA 460, a two-part water-based epoxy primer

used to seal concrete and masonry

surfaces.

Non-Porous

Surfaces: WPA 160, a specialised solvent-free

primer designed for enhancing the adhesion of

subsequent membranes.

Transitions: WPA Elastoband, an innovative detailing system

> designed for waterproofing and sealing all types of points, junctions and general areas

subject to movement.

WPA 200, a highly flexible, two-part, rapid Membrane:

> drying, cementitious waterproofing membrane (minimum of 2 coats to achieve a DFT of 1000

microns).

### **BIO RETENTION BASIN - NEGATIVE APPLICATION**

Crack

Repairs: Mapei Lamposilex Waterstop, an ultra-fast

setting and curing hydraulic binder for stopping

water leaks.

Fillets /

Mapegrout T40, a medium strength (40 MPa), Covings:

fibre-reinforced, thixotropic concrete

repair mortar.

WPA 100, a single-component, fibre-reinforced, Membrane:

> rapid-drying, cementitious waterproofing membrane (minimum of 3 coats to achieve a

DFT of 3000 microns).
